

CHAPTER Env-A 400 ACID DEPOSITION CONTROL PROGRAM

Statutory Authority: RSA 125-D:3

Readopt with amendments and renumber Env-A 401.01 through Env-A 406.02, effective 3-5-97 (Doc. #6469-B), as Env-A 401.01 through Env-A 405.02 to read as follows:

PART Env-A 401 PURPOSE AND SCOPE

Env-A 401.01 Purpose. The purpose of this chapter is to reduce the adverse effects of acid deposition on ecosystems and public health by reducing sulfur dioxide (SO₂) emissions from sulfur-emitting sources within New Hampshire pursuant to RSA 125-D:3.

Env-A 401.02 Scope. This chapter shall apply to all sources ~~in operation from 1979 to 1982~~ that emitted 100 tons or more of SO₂ per year *on average during 1979 through 1982*.

PART Env-A 402 REQUIRED EMISSION REDUCTIONS FROM CLASS A MAJOR SOURCES

Env-A 402.01 Limitations on Percentage of Baseline. Pursuant to RSA 125-D:3, I(b) annual SO₂ emissions from each Class A major source, except as provided by Env-A 404.01, shall not exceed 75 percent (%) of such source's portion of the baseline emissions.

PART Env-A 403 REQUIRED EMISSION REDUCTIONS FROM CLASS B MAJOR SOURCES

Env-A 403.01 Limitations on Individual Sources. Pursuant to RSA 125-D:3, I(e), annual SO₂ emissions from each Class B major source, except as provided by Env-A 404.02, shall have an average emission rate not to exceed 1.6 pounds of SO₂ per million BTU heat input, equivalent to no. 6 oil with 1.5% sulfur by weight, which is 75% of the baseline average emission rate for Class B major sources.

Env-A 403.02 Maximum Total Emissions. Pursuant to RSA 125-D:3, I(c), for each running 4-year period, the combined SO₂ emissions from all class B major sources shall not exceed 75% of their combined baseline SO₂ emissions.

PART Env-A 404 EMISSIONS FROM MULTIPLE SOURCES UNDER COMMON OWNERSHIP

Env-A 404.01 Class A Major Sources. Pursuant to RSA 125-D:3, I(f)(1), the owner or operator of 2 or more sources under common ownership that are subject to the provisions of Env-A 402 may combine the annual emissions of all such sources to demonstrate that the total annual emissions of such sources do not exceed 75% of their baseline emissions for Class A major sources.

Env-A 404.02 Class B Major Sources. Pursuant to RSA 125-D:3, I(f)(2), the owner or operator of applicable sources under common ownership that are subject to the provisions of Env-A 403 may average the emission rates of all such sources on a BTU heat input basis to demonstrate compliance with the average emission rate for Class B major sources.

PART Env-A 405 RECORDKEEPING AND REPORTING REQUIREMENTS

Env-A 405.01 Recordkeeping Requirements. The owner or operator of a source meeting the applicability criteria of Env-A 401.02 shall be subject to the recordkeeping requirements specified in Env-A 903.03.

Env-A 405.02 Reporting Requirements. The owner or operator of a source meeting the applicability criteria of Env-A 401.02 shall be subject to the reporting requirements specified in Env-A 907.02.
